

# 5000 Series Two-Way Auto Gate

**TURNSTILE**  
Security Systems Inc.

Since 1981, Turnstile Security Systems has been a manufacturer of quality pedestrian control products. Our goal is to provide our customers with the highest quality products with unsurpassed customer service.

The 5000 Series Two-Way Auto Gate creates an open, barrier free look that is inviting to your customers but also provides protection from theft and shrinkage. This is achieved with a variety of pleasing entry solutions that can be paired with our proven exit deterrent options.

## KEY BENEFITS & FEATURES

- Available in single and multiple gate configuration that can interface with fire alarms and POS systems
- Automatic hands free gate with 180 degree action
- A number of opening controls are available to suit your circumstances
- Opening and closing times can be fine-tuned for perfect performance
- ✓ A versatile solution for accessibility and security in both entry and exit
- ✓ Robust design and high build quality ensures worry-free service for many years
- ✓ Selectable configuration for Standard, Welcome, Secure and Self-Checkout modes
- ✓ Available in several materials, RAL powder coat and with optional branding message on gate arm

# 5000 Series Two-Way Auto Gate

**TURNSTILE**  
Security Systems Inc.

Since 1981, Turnstile Security Systems has been a manufacturer of quality pedestrian control products. Our goal is to provide our customers with the highest quality products with unsurpassed customer service.

**DESIGN**

You can adapt and customize the 5000 Series Two-Way Auto Gate to perfectly suit your own brand. LED-lighting, engravings, chrome, stainless steel or painted finishes are only some of the choices available.

**FLEXIBILITY**

5000 Series Two-Way Auto Gate is the flexible choice for virtually any application; the numerous operational modes and design options make the 5000 Series Two-Way Auto Gate a truly universal solution.

**QUALITY**

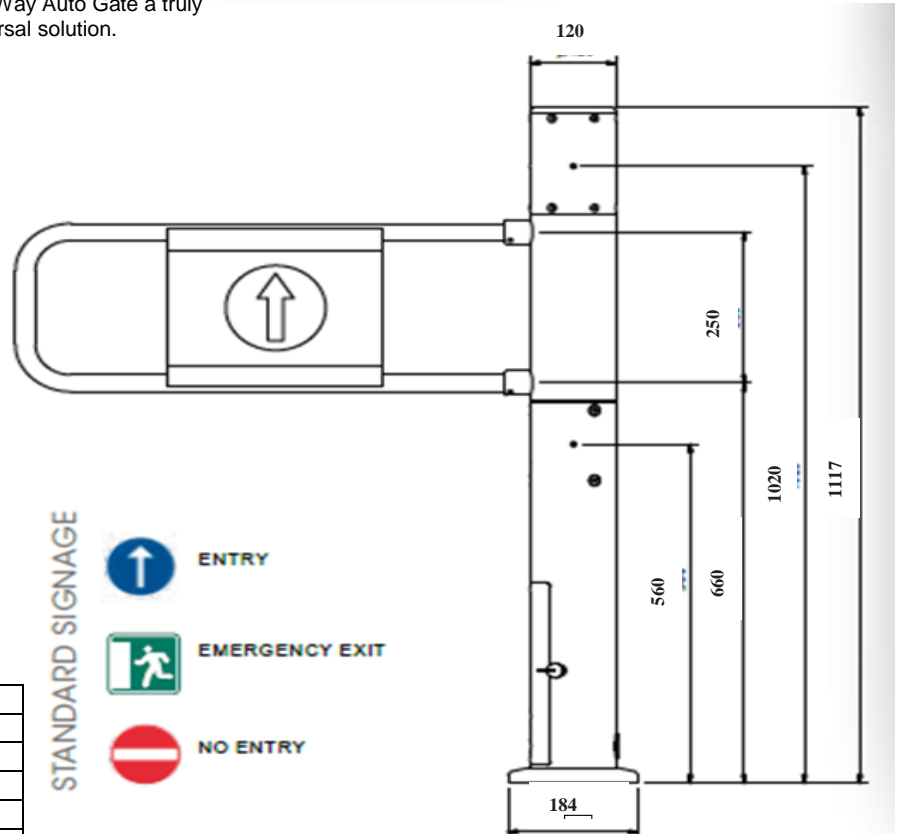

5000 Series Two-Way Auto Gate is based on a robust design with well-proven mechanics, giving durable performance and low maintenance and life-cycle costs.
