

3-ARM (DROP ARM) TURNSTILE

SCOPE OF OPERATION

- Turnstile Security Systems Inc's 1100 series line of waist high turnstiles provide an excellent means of controlling and counting the flow of pedestrian traffic in and out of your facility
- Heavy duty construction, the latest in materials and manufacturing techniques ensure years of trouble free operation.

MATERIALS

All materials meet the ASTM standards as set forth by the materials industry.

- 304 stainless steel cabinet and lid.
- 20" aluminum arms.
- 12 volt operating system.
- Dry contact relay.
- Heavy duty pull type solenoids

FINISHES

- Full stainless steel polished to a #4B finish.

OPERATION

- Functions the same as our standard 3 arm turnstiles but arm drops in case of emergency or power failure.
- Allows for one or two way passage, directions are set during fabrication.
- Activation is achieved by supplying a dry contact input through a push button or access control software.
- Standard micro-switch activation for automatic reset.
- Directional indicator.

OPTIONS

- Push button.
- Electronic counter.
