

## 4-ARM TURNSTILE

## SCOPE OF OPERATION

- Turnstile Security Systems Inc's 1000 series 4- arm Turnstiles provide an excellent means of controlling the flow of pedestrian traffic in and out of your facility. A turnstile gate and railing system can improve security and reduce losses. Modular posts, rails and other of the shelf components combine with turnstiles to create a clean, functional and custom entrance system.
- The 4 arm turnstile header post is specifically designed to breakaway in case of an emergency.

## MATERIALS

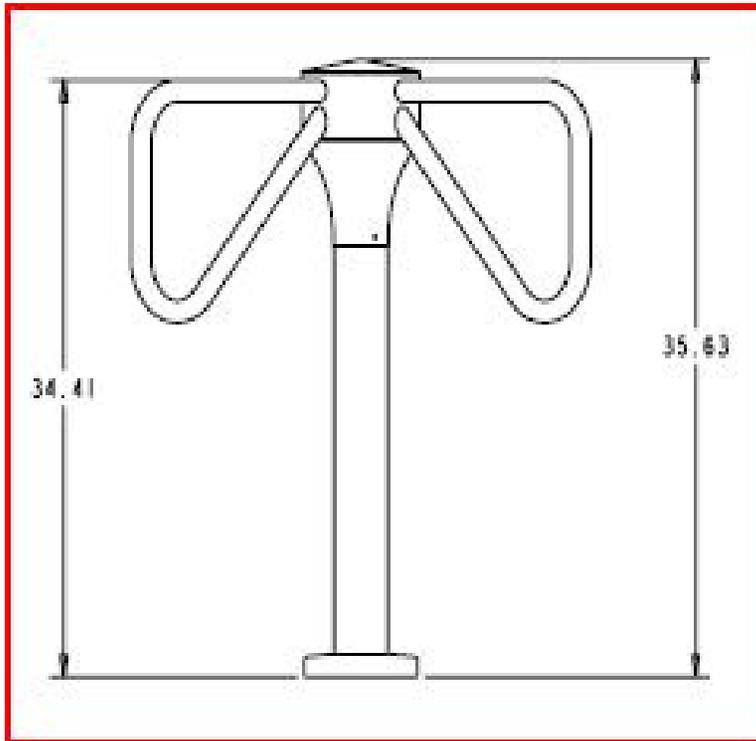

All materials meet the ASTM standards as set forth by the materials industry.

- Turnstile Cat. # 1001 & 1002 offer safety and good appearance. Rugged construction, incorporating heavy gauge materials and bearings on moving surfaces, provides years of trouble free service.
- Turnstiles are available with clockwise rotation Cat # 1002 or counter-clockwise rotation Cat # 1001.
- Bolt heads are hidden by a cover which snaps over the floor mounting flange.
- Header Post Cat. # 1003-sr, 2 (two) Curved Rails. # 1004, and 2 (two) Cat. # 1013 End Posts are required to complete the installation. Minimum floor space 48" x 42".

## FINISHES

- Satin chrome finish
- Bright chrome finish
- Powder coat paint.
